

Order with a structure, not a rulebook.

Enjoy the meal and make the important choices deliberately.

THE IDEA, AT A GLANCE

Build the order in three passes

01 / Anchor

Choose a protein source you enjoy and can eat.

02 / Complete

Add vegetables and a suitable carbohydrate.

03 / Choose

Decide which extras you actually want.

A decision aid, not an instruction to remove every sauce or carbohydrate.

01 / WHY THIS WORKS

Energy balance influences weight change over time. An eating pattern you can sustain matters more than treating one restaurant meal as a pass-or-fail test.

THE LIMIT OF THE EVIDENCE

Restaurant portions and recipes vary. This guide cannot estimate calories precisely or verify allergen safety.

THE LINE TO REMEMBER

One meal can fit a good week without being a perfect meal.

What kind of meal is this?

01 / A routine business lunch

Pick a familiar main meal that fits your usual structure. If portions are large, stop at comfortable fullness; taking leftovers is optional.

02 / A special dinner

Choose the course or drink you most want. Eat normally earlier in the day; do not arrive deliberately starved.

03 / Dietary restrictions

Check ingredients and preparation with the venue. For kosher needs, suitable certification and meat/dairy separation cannot be inferred from a menu name.

03 / IN A REAL WORKING WEEK

Illustrative scenario - not a client result

A client selects an Italian restaurant. You still want to stay close to your plan.

Useful move: Choose a suitable main and vegetables, then decide whether dessert or drinks matter to you tonight.

Why: A clear choice is easier than trying to classify the entire menu as good or bad.

04 / USE THIS TODAY

01 / Check the menu before arriving if useful.

02 / State dietary requirements clearly.

03 / Return to your usual next meal, regardless of what you ordered.
